

TeamConnect Bar

All-In-One Device for Collaborations Rooms

Firmware Update

- The TeamConnect Bar firmware update requires the Sennheiser Control Cockpit software:
www.sennheiser.com/control-cockpit-software

Firmware Version 1.1.7 - Release Date 2024-11-28

Features and Improvements

Active mic channel indication in Control Cockpit

- In the 'Automix Priority' box, the currently active channel is indicated by a green dot above its channel setting.
- Sound from speaker will not affect channel indication.

Bug fixes

- TC Bars can now be claimed in the Dante Domain Manager using "enroll device by IP"
- Dante® packets are now isolated from the control net
- TC Bar M hostname improved with interface e.g. "TCBarM-0111002345-Control"
- Dante® Near End Stream will stop if USB is disconnected

Known Issues

- When connecting both ports of the TC Bar M to a common switch, there is a risk of creating loops. Make sure your TC Bar M is always connected to two different networks that do not run via a common switch. For more details see chapter [Network Loops](#) of the user manual.
- When manually adding a TC Bar to the Control Cockpit, the TC Bar can no longer be deleted unless it is offline.
- If the IP of the TC Bar is greyed out or the TC Bar cannot be controlled via Control Cockpit, the control service may not be accessible, a restart of the TC Bar is recommended.
- As an interim solution, the PoE function has been disabled on TC Bar M to avoid any possible damage to the device.
- In Split Mode, the TC Bar M cannot be controlled via the Dante Domain Manager as long as both ports are connected (control network and Dante® network). As a workaround, the function can be restored by disconnecting the control network from the TC Bar until the Dante® settings have been made.

Previous Releases

Firmware version 1.0.3 - Release Date 2024-07-04

- Bugfix : The issue preventing the use of Dante® on TC Bar M in Single Domain Mode has been fixed.

Firmware version 1.0.0 - Release Date 2024-06-10

- Initial firmware release v1.0.0 for TeamConnect Bar S and TeamConnect Bar M.
